Subject: Justice???

To Whom It May Concern:

It seems difficult to believe that the U.S. Government is STILL persecuting the company and the man who have brought about a revolution at least as great as the Industrial Revolution.

This same government would be INOPERABLE if Bill Gates and Microsoft didn't exist.

If another operating system of superior value were "out there," the market place would surely have discovered it by now.

Frankly, if I were Mr. Gates, I'd simply shut down Microsoft and let you folks stew in your own juice.

Sincerely,

Doug Spittler
